2. Technical Maintenance

a. Issues

- Designs are too old and need to be updated
- Collaboration between designers is difficult with offline tools
- Photoshop and Illustrator have difficulty keeping consistency with styling
- Giving clients feedback is difficult with .jpg and .pdf files
- No way to animate website using current Adobe Photoshop technology.

b. Solutions

- Create updated designs to improve on visual quality and presentation
- Use Figma's online collaboration tools to asynchronously work on designs in real-time
- Use Figma's asset system to have a shared team library to easily update colours, styling and graphics

- Use online sharing features in Figma to give client's ability to comment and make requests on designs
- Use prototyping features in Figma to animate designs and make them interactive.

a. Tasks

- Update database with proposed solutions and tasks
- Assign them to appropriate team members and inform lead developer
- Create updated designs as per project brief
- Set up asset system to easily have designs updated across the team
- Make use of the prototyping features located in Figma
- Send designs to Lead Developer for comments and feedback.

3. Content Analysis

a. Content Review

- Current content is wireframes, logos, concepts, and mood boards.
- File format is as .jpg, .png, .psd and .ai
- Resolution is very low and graphics needs to be converted into vector files.
